### **DETAILED ACTION**

Claims 1-12 are pending in the case.

Any rejection of record in the previous action not addressed in this office action is withdrawn. There are no new grounds of rejection that were not necessitated by applicants' amendment and therefore, this action is final.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Donohue et al. (US Patent 6,709,854) in view Hiom et al., Grant et al., and Swartz et al. (all previously cited).

This rejection is maintained essentially for the reasons set forth in the previous Office action, mailed 10/8/08.

Applicant's arguments filed 4/8/09 have been considered but have not been found convincing.

Applicants have argued that the secondary references do not discuss the efficiency of transformation that is achieved in the mutated strains. Applicants further argue that the claims recite a bacterium with high efficiency transformability, and that there is no information on the transformation efficiency of the mutated bacteria in the cited art. However, as was previously stated, the references teach that mutations in *mcrA*, *mcrA* and *mrr* result in strains that allow transformation with methylated DNA and

which facilitate cloning of modified chromosomal DNA. Each of the alterations present in the claimed strain is taught in the art, and would have been known by those of ordinary skill in the art to be useful in any bacterial strain of interest, for conferring the properties known to be associated with them. The construction of bacterial strains containing mutations in genes, for conferring the property known to be associated with said mutations, was well known in the art. Therefore, there would have been a reasonable expectation of success when constructing a strain having the known mutations, and the rejection is maintained.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
